

- 9999 PLU Record
- Wi fi, LAN for Data Transfer
- 1 lakh transactions can be save by FIFO
- On screen check weighing & check counting facility
- 99 Label Design
- 9 Operator Log in with password
- Robust 3 Layer HD Resistive Display (Glass, Touch, Protection)
- 2 USB Ports, 2 Serial Communication Port
- Available in Abs, Steel and Table Top body format
- Data Search and Recall Facility
- Calibration Reminder Facility

OVERVIEW

An advanced and customized solution towards Next-generation technology specially designed for automobile and auto ancillaries industry to enhance the efficiency of weighing and counting.

TYPES

G7
(7 inch display, Abs body)

G10
(10 inch display, SS body)

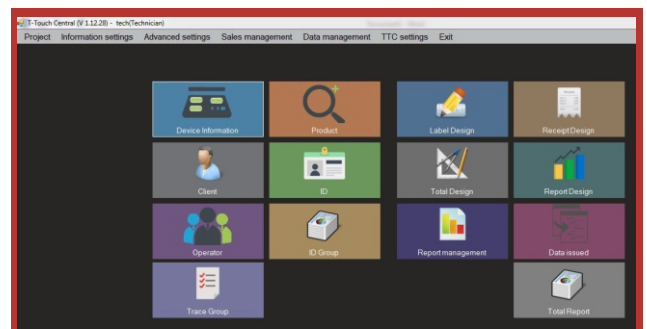

GA7
(7 inch display, Table Top format)

FUNCTIONS

- Part Counting
- Data Logging
- Online Check Weighing
- FIFO Process
- Inventory Control
- Barcoding
- Labelling
- ERP / SAP Integration

PC END SOFTWARE

- G series indicator comes with a PC end software.
- Customizable Label format designing
- Barcode generation
- Customizable sales UI interface
- Management of product information
- Data backup and recovery and changeable language

TOTAL SOLUTION FOR WEIGHING/COUNTING APPLICATION

- Device information management
- Product Information Management
- Print Format Management
- Report Management

ADVANTAGES OF GNS

- To reduce the manpower for counting facility.
- To avoid human error of counting & save the time while dispatching and receiving material.
- To control on inventory.
- To control on mismatching of spares at the time of inventory.
- To have the traceability of actual Weighment.
- To get the complete report of materials received from different suppliers.
- Easily transferred weighing result to computer or mobile in the form of (excel) via Wi-fi, USB, LAN, Pen drive.
- Helps to make production control accurate and processes faster and more efficient up-to-date weighing information.
- It is also useful in quality control and tracking defects.
- Improve productivity.

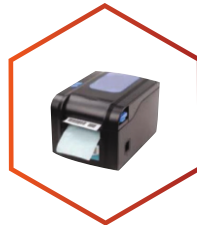

ACCESSORIES

USB
Keyboard

Scanner

Printer

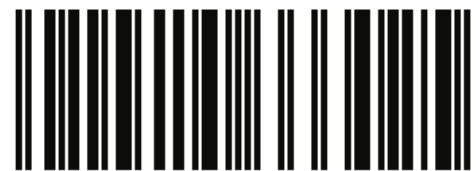

Tower
Lamp

ERP
Integration

FEATURES

- Fast Counting Process
- Accurate Weighing Report
- Get Report In Standard Excel
- Export Weighing Data via USB Pen drive, LAN, Wi filP Address
- Capture Real Time Date
- Multiple Label Generation with Barcode
- Stock Inventory & FIFO
- Avoid Human Error
- Complete Traceability of Stock
- Stand Alone Device with No PC Requirement

TESTIMONIAL

“ Before parts weighing & counting was a challenge, but Gramton G7 indicator has replaced all these issues and functioning very well with data storing facility which helps us to maintain the inventory control. It is one of the advanced weighing indicator I have seen till date.

MINDA

“ We are using GA7 from last 1 year and it has improved our productivity with multifunctional features and data saving facility. This machine has played a very important role at audit days. It has fantastic memory and it has eased our work with great efficiency. ”

AMPHENOL

“ Our inventory has been controlled by G series indicators as we are very happy with the best quality material machine which has minimized the maintenance and working consistently fine from last 8 months. We never imagined that barcoding, labelling, counting, data storing and all other special features for automobile industry will be there in one machine. ”
